WHY CHOOSE US?

## Why Choose H R Global INC

With over 50 years of industry expertise, HR Global INC delivers high-quality welding and cutting rods, including underwater solutions. We ensure precision, durability, timely delivery, competitive pricing, and exceptional customer support for all industrial applications.

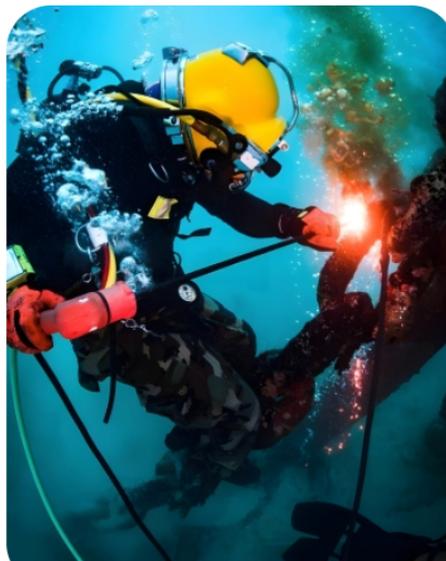

### Innovation Solutions

We deliver cutting-edge welding and cutting technologies, combining advanced engineering, precision, and reliability to meet diverse industrial challenges efficiently.

**500+**

Satisfied Clients

### Quality Craftsmanship

We provide cutting-edge welding solutions with unmatched precision, durability, and expert craftsmanship, delivering reliable, efficient results for diverse industrial applications.

**1000+**

Projects Successfully Completed

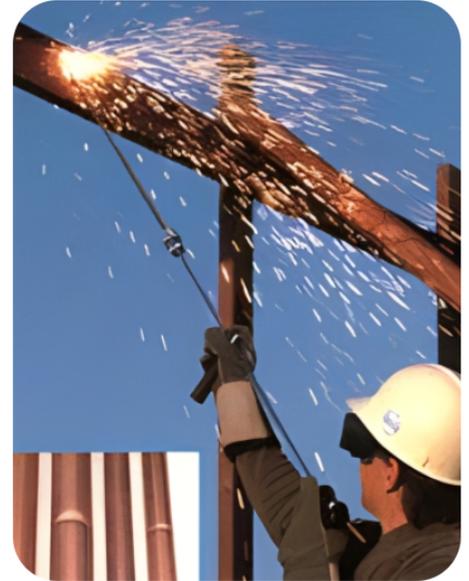

## Expertise And Experience

With decades of **experience and industry expertise**, we deliver innovative **welding solutions** combining precision, durability, and superior craftsmanship for reliable and efficient industrial applications.

## OUR INSTRUCTION

# Advanced Industrial Cutting Rod Technology

BROKO™ Industrial Premier Cutting and Premier Cutting Ultrathermic rods contain core wires which burn in excess of 10,000° F at the tip. BROKO™ rods cut, melt or liquefy virtually any known substance.

These internal rods are recessed at the torch end to prevent burn back into the torch. This safety feature is unique to BROKO™ Industrial. Circular crimps secure the internal wires. BROKO™ Industrial Ultrathermic rods can be bent without restricting oxygen flow or splitting, enabling the operator to reach difficult or otherwise inaccessible places and ensure even burn. Premier Cutting rods are available in 1/4", 3/8" and 1/2" diameters and varying lengths. Size choice makes them efficient and adaptable to specific applications. Rods sized 3/8" x 18" and 3/8" x 36" are BROKO™'s new Premier Cutting rods, producing 20% longer burn time and 25% more cutting per rod.

All BROKO™ rods are manufactured under rigid quality control standards and inspected prior to packaging for reliable performance.

All products are available in indigenous Quality.
